EDUCATION

Bachelor in Information Technology **GPA: 3.5/4.0** 2015 – 2019

University of Information Technology (UIT), Ho Chi Minh City, Vietnam

LANGUAGES & CERTIFICATIONS

Languages: English (TOEIC 800), Japanese (N3), Thai (Basic)

Certifications: Computer Vision, Deep Learning, TensorFlow Developer

TECHNICAL SKILLS

Programming: Python, C++, Java, JavaScript, SQL

AI/Computer Vision: OpenCV, TensorFlow, PyTorch, YOLO, LSTM, Object Detection, Image Classification, Video Tracking

Game Development: Unity3D, Unreal Engine, C#

Data Engineering: ETL pipelines, SQL/NoSQL databases, data preprocessing, data visualization

Tools/DevOps: Git, Docker, AWS, REST APIs, Agile/Scrum

EXPERIENCE

Tester **01/2016 - 12/2017**

- ✓ Conducted manual and automated testing for web and mobile applications.
- ✓ Prepared detailed test cases, test plans, and bug reports.
- ✓ Collaborated with developers to resolve software defects and improve quality assurance.

Game Developer **01/2018 - 12/2021**

- ✓ Developed interactive games using Unity3D and Unreal Engine for PC and mobile platforms.
- ✓ Implemented game mechanics, AI logic, and multiplayer features.
- ✓ Optimized game performance, graphics rendering, and memory usage.
- ✓ Collaborated with designers, artists, and QA to deliver high-quality products.

Data Engineer **01/2022 - 12/2022**

- ✓ Built ETL pipelines for structured and unstructured data.
- ✓ Developed data preprocessing and cleaning scripts for large datasets.
- ✓ Worked with SQL and NoSQL databases for data storage and retrieval.
- ✓ Assisted AI team in providing data for model training and evaluation.

PROJECTS

Computer Vision: Real-Time Object Detection System

- ✓ Built a real-time object detection system using YOLOv8 and OpenCV.
- ✓ Trained model on custom datasets for multiple object classes with data augmentation.
- ✓ Integrated model into a desktop application for live video feed analysis.

Image Classification & Tracking for Robotics

- ✓ Developed a pipeline to classify and track objects in robotics applications using TensorFlow and PyTorch.
- ✓ Implemented LSTM-based video analysis for temporal action recognition.
- ✓ Collaborated with hardware engineers to optimize system latency and accuracy.
