EDUCATION

Bachelor in Information Technology

GPA: 3.5/4.0 2018 – 2022

Can Tho University, Can Tho, Vietnam

SKILLS

Programming Languages: Python, C#, C++, JavaScript, SQL.

AI & Computer Vision: OpenCV, TensorFlow, PyTorch, YOLO, LSTM, GANs.

Game Development: Unity3D, Unreal Engine, C#.

Testing & Tools: Selenium, JMeter, TestRail, Git, Jira.

English: IELTS 7.5 (03/2025).

EXPERIENCE

Game Developer

01/2022 - 12/2023

- ✓ Designed and developed 2D and 3D game prototypes using Unity3D and Unreal Engine.
- ✓ Implemented game mechanics, AI behaviors, and optimized performance for multiple platforms.
- ✓ Collaborated with artists and designers to integrate assets and maintain workflow efficiency.

Software Tester

01/2020 - 12/2021

- ✓ Executed functional, regression, and performance tests on web and mobile applications.
- ✓ Reported and tracked bugs using Jira and TestRail, improving release quality.
- ✓ Developed automated test scripts with Selenium to accelerate testing cycles.

PROJECTS

Traffic Loss Evaluation AI System

- ✓ Built a computer vision system to evaluate traffic congestion and detect vehicle loss on roads.
- ✓ Implemented YOLO and OpenCV-based detection algorithms with 90% accuracy on test datasets.
- ✓ Deployed as a prototype web dashboard to visualize traffic metrics in real-time.
- ✓ Github: <https://github.com/voanhtuan/TrafficLossAI>

Fine-Tuning Large Language Model (LLM)

- ✓ Conducted fine-tuning experiments on pre-trained LLMs for domain-specific tasks.
- ✓ Preprocessed datasets, optimized hyperparameters, and evaluated model performance.
- ✓ Integrated the fine-tuned model into a question-answering system with Python backend.
- ✓ Github: <https://github.com/voanhtuan/FineTuneLLM>
