EXPERIENCE

Frontend Developer

01/2022 - 12/2023

- Developed responsive user interfaces using React and Next.js for corporate web applications.
- Optimized UI/UX performance, ensuring cross-browser and mobile compatibility.
- Collaborated with designers and backend developers to implement new features.

Business Analyst

01/2020 - 12/2022

- Collected and analyzed business requirements from clients for multiple projects.
- Created wireframes, UML diagrams, and functional specifications.
- Coordinated with development teams to ensure accurate implementation of business requirements.
- Conducted stakeholder meetings and presented project updates.

PROJECTS

PetShop Web Application

- Built an e-commerce platform for managing and selling pets online using Vue.js frontend and Node.js backend.
- Implemented shopping cart, payment integration, and inventory management features.
- Designed admin dashboard for tracking orders and users.
- Github: <https://github.com/lephuonguyen/PetShopWeb>

Gym Management Web Application

- Developed a web system to manage gym memberships, trainers, schedules, and payments using React and Node.js.
- Created dashboards for staff and members to monitor attendance, sessions, and billing.
- Implemented role-based access control for admins, staff, and members.
- Github: <https://github.com/lephuonguyen/GymManagementWeb>

CAREER OBJECTIVE

- Seeking the position of **Project Manager** to leverage 3 years of Business Analyst experience and 2 years of Frontend Development expertise to manage cross-functional projects effectively.
